ABOUT ME

I am a recent graduate in Industrial Engineering with a strong interest in artificial intelligence, particularly deep learning. During my studies, I focused on developing and applying neural network models for real-world problems, and I am eager to deepen my expertise through advanced research. I am currently exploring PhD opportunities where I can contribute to and grow within the field of deep learning and AI.

EDUCATION

Masters in Industrial Engineering, Specialization : Data Science & Artificial Intelligence
2025

Ecole Nationale Polytechnique, Algiers, Algeria

- ✓ *Score:* 15.61/20
- ✓ *Related coursework:* Machine Learning ,Big Data and IOT
- ✓ *Thesis:* Prediction of Hypoglycemia Episodes in Type 1 Diabetes Patients

National Competitive Exam for Admission to National Higher Schools 2022

Ecole Nationale Polytechnique, Algiers, Algeria

- ✓ *National Ranking:* 82 of 1723 graduate
- ✓ *Related coursework:* Preparatory classes for STEM fields (core subjects: math, physics and chemistry)

RESEARCH PROJECTS

Prediction of Hypoglycemia Episodes in Type 1 Diabetes Patients

- ✓ Implemented various Deep Learning models for sequential data.
- ✓ Tested and benchmarked different approaches using out-of-distribution settings to ensure generalization and consistency in performance.
- ✓ Solved Class imbalance by introducing synthetic instances generated using Diffusion model, this has lead to an overall increase in recall.
- ✓ Used SHAP library to explain the behavior of DL black-box models.

Recommendation systems in Telecommunication Industry

- ✓ Implemented multiple models to produce a recommendation-engine trained on proprietary data.
- ✓ Taking into consideration the Top 10 recommended offers out of the list of more than 300 existing proposed plans, more than 60% of customers have purchased at least one of the recommended offers.

SKILLS

Technologies

- ✓ Python
- ✓ C++
- ✓ Java Script
- ✓ PyTorch
- ✓ Hugging Face
- ✓ Fast API
- ✓ Solidity

- ✓ SQL
- ✓ HADOOP
- ✓ Spark

Technical

- ✓ Data Science
- ✓ Artificial Intelligence
- ✓ Data Engineering
- ✓ Optimization
- ✓ Robotics
- ✓ Automation
- ✓ IOT
- ✓ Blockchain

Data Science & AI

- ✓ Machine Learning
- ✓ Deep Learning
- ✓ Computer Vision
- ✓ Time Series Forecasting
- ✓ LLMs
- ✓ Generative Artificial Intelligence
- ✓ Big Data
- ✓ Business Intelligence
- ✓ Explainable AI

Languages

- **Arabic**: Mother tongue
- **French**: Second language
- **English**: Very good
- ✓ IELTS: Listening–8.5, Reading–8, Writing–7, Speaking–7.5.

EXPERIENCE

Research Assistant Intern

Feb 2025 – May 2025

Université TÉLUQ, Montreal, Canada

- ✓ Used AI techniques and sequential models to predict glycemic adverse events in diabetes patients based on vital signs.

Data Scientist Intern

Apr 2023 - May 2023

Djezzy, Algiers, Algeria

- ✓ Worked on a recommendation system to enhance customer experience, and present the right offer for the right client.

CERTIFICATIONS & AWARDS

- ✓ Mitacs Globalink Research Award 2025.
- ✓ Won the First prize in HAIK National Datathon 2024.
- ✓ Won the First prize in GAME CRAFT National GameJam 2023.
